

LS 1 Loading System

This small loader is perfect for the First Time Concrete Supplier. With a minimum of capital, you can begin supplying your customers with trailered ready mix and build your business up to a plant within a couple years. U-Cart offers a "Starter System" package for you. This includes one LS 1 and two Mixing Trailers. When you decide it is time to put a plant in because of all of the business you have, we will then buy back the Loading System and credit that toward the purchase of a plant and more trailers. Please ask us about the "Starter System" Program.

Compact and portable, this loading system is perfect for the small contractor, first time supplier, and for long term jobs where on call concrete is needed. This loader can be filled with a Bobcat or other small piece of loading equipment.
